

WCM OR "LEAN" IMPLEMENTATION WORKSHOP

For businesses in South Africa, run by South Africans, staffed by South Africans

You can succeed in **reducing cost, waste & increasing profitability** – here, now, in South Africa's volatile economy. You can implement & maintain a successful World Class Manufacturing program.

You need to bring the passion & the grit; we bring the **simple effective steps** you need to follow.

World Class Manufacturing is rooted in Compliance – the organizational & behavioral characteristics required by WCM include discipline, measurement – visual management – passion & consequence – daily accountability.

These need to be consistently applied & demonstrated by the leaders of the business if we are to expect our people to demonstrate them.

Leader Standard Work provides the tools, methods & behaviors which leaders must adopt to succeed in WCM.

Sounds good but where do we start?

WCM / LEAN FOUNDATION PHASE

The Foundation Phase: *

- Workplace Organisation – 5S
- Visual Performance
Measurement
- Leader Standard Work

First Step in Discipline = Workplace Organisation

Often referred to as housekeeping & immediately written off by much of RSA Management who associate the term with window dressing; workplace organization is the foundation of professional, profitable, sustainable world class performance.

First Step in Measurement = Understanding what needs to be measured & on what frequency – and then making that measurement visible.

Find where you are bleeding money & stop the negative flow.

First Step in Accountability = Leader Standard Work – at Executive, Supervisory & Team Leader levels in the business.

This doubles as the first step in culture change, behavior change- creating urgency following Kotters proven model.

*The Foundation Phase is followed by the Toolbox Phase which is followed by the Sustain Phase

WAREHAM & ASSOCIATES
