PROCESS CONTROL TRAINING

(DATASHEET # 7.1-13)

DURATION: 2 DAYS

Who should attend this training?

This course is targeted at supervisory level.

What is the course all about?

To equip delegates with the skills and knowledge to implement effective quality & food safety process control systems in a continuous and high volume batch production process environment.

- What is a controlled process?
- How do I control our production process in practice?

This often-used term is much misunderstood and is the backbone of any quality control, quality management, or throughput/output efficiency programme.

What will you learn about?

Address key elements of Process Control in each of the following stages:

- Pre-Production
- Set-up
- Production operations

Including:

- Process Specifications
- Skills development needs analysis
- Process Flow Charts
- Identification of critical product & process

Variables:

- Set-up control
- Shift handovers
- Short Interval Control (Product/Process)
- 1st off Inspection
- In-process monitoring
- Visual Performance Management
- Defect tagging and reporting

Prior Experience & Learning

Knowledge, comprehension and application of language, mathematics, natural science and technology on NQF 4.

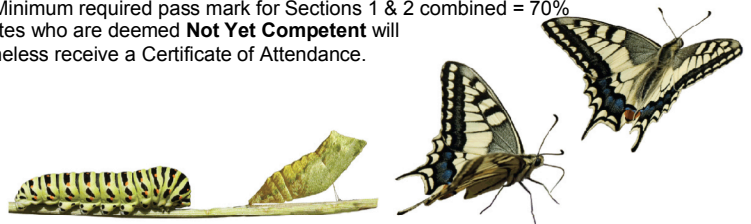

Assessment & Certification

Successful candidates will be awarded a certificate from Wareham & Associates.

In order to be deemed Competent, delegates must attain the following results:-

- Process Control Case Study in the workplace with a weighting of 50% of the Total Mark.
- Written exam – a minimum of 70% with a weighting of 50% of the Total Mark.
- Minimum required pass mark for Sections 1 & 2 combined = 70%

Delegates who are deemed **Not Yet Competent** will nevertheless receive a Certificate of Attendance.
