World Class Manufacturing (WCM) or “Lean” Implementation

*For businesses in South Africa, run by South Africans,
staffed by South Africans*

- You can succeed in reducing cost, waste & increasing profitability – here, now, in South Africa's volatile economy. You can implement & maintain a successful World Class Manufacturing program.
- You need to bring the passion & the grit; we bring the simple effective steps you need to follow.
- World Class Manufacturing is rooted in the organizational & behavioral characteristics of **discipline**, measurement – **visual management** – passion & consequence – **daily accountability**.
- These need to be consistently applied & demonstrated by the leaders of the business if we are to expect our people to demonstrate them.

Sounds good but where do we start?

WCM / LEAN FOUNDATION PHASE

First Step in Discipline

- Workplace Organisation
- Often referred to as housekeeping & immediately written off by much of RSA Management who associate the term with window dressing; workplace organization is the foundation of professional, profitable, sustainable world class performance.

First Step in Measurement

- Understanding what needs to be measured & on what frequency – and then making that measurement visible.
- Find where you are bleeding money & stop the negative flow.

First Step in Accountability

- Leader Standard Work – at Executive, Supervisory & Team Leader levels in the business
- This doubles as the first step in culture change, behaviour change – creating urgency following Kotters proven model

THE FOUNDATION PHASE

- Workplace Organisation – 5S
- Visual Performance Measurement
- Leader Standard Work

The Foundation Phase is followed by the Toolbox Phase which is followed by the Sustain Phase

3 PHASE IMPLEMENTATION SUMMARY

Foundation

Discipline
Accountability
Measurement

Toolbox

Asset Management
Process Control
Diagnostic
Root Cause Analysis
Product Mix
Flexibility

Sustain

Change Control
Risk Management
